

BIODEGRADABLE

BioSport 500/750ml

Styled on our iconic Olympic 500ml bottle, the BioSports bottle is manufactured from a revolutionary green bioplastic which will biodegrade in active landfill in 3-5 years.

BIODEGRADABLE

UK-MADE

BPA FREE

ZERO WASTE

REUSABLE

FLEXIBLE AND DURABLE

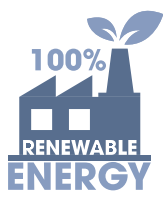

DISHWASHER SAFE

HIGH - ENERGY EFFICIENT

SUSTAINABLY PACKAGED

100% RENEWABLE ENERGY

HOW TO GUIDE To Biodegradability

1

During the manufacturing process, we introduce the EcoPure® additive to enhance biodegradability.

2

EcoPure®-treated plastics need an active microbial environment to biodegrade.

3

EcoPure® activates solely in the presence of landfill micro-organisms and enzymes, not during storage, transportation, or the usable life of the product.

4

The additive accelerates biodegradation when bottles are in landfill, decomposing within 3-5 years.

Benefits of the Bio Bottle

- Biodegradable plastics help solve the problem of plastic waste.
- EcoPure®-treated plastics break down entirely, leaving no harmful chemicals behind and can generate clean energy.
- FDA approved, non-toxic and safe for food-contact applications.
